LALIQUE

RINGS SIZE GUIDE

To find your ring size, print this guide on an A4 size sheet of paper on a scale of 100%. To make sure you have printed it correctly, place a credit card on the line below. The scale is correct if the credit card and the line are the same length.

PLACE THE CREDIT CARD HERE

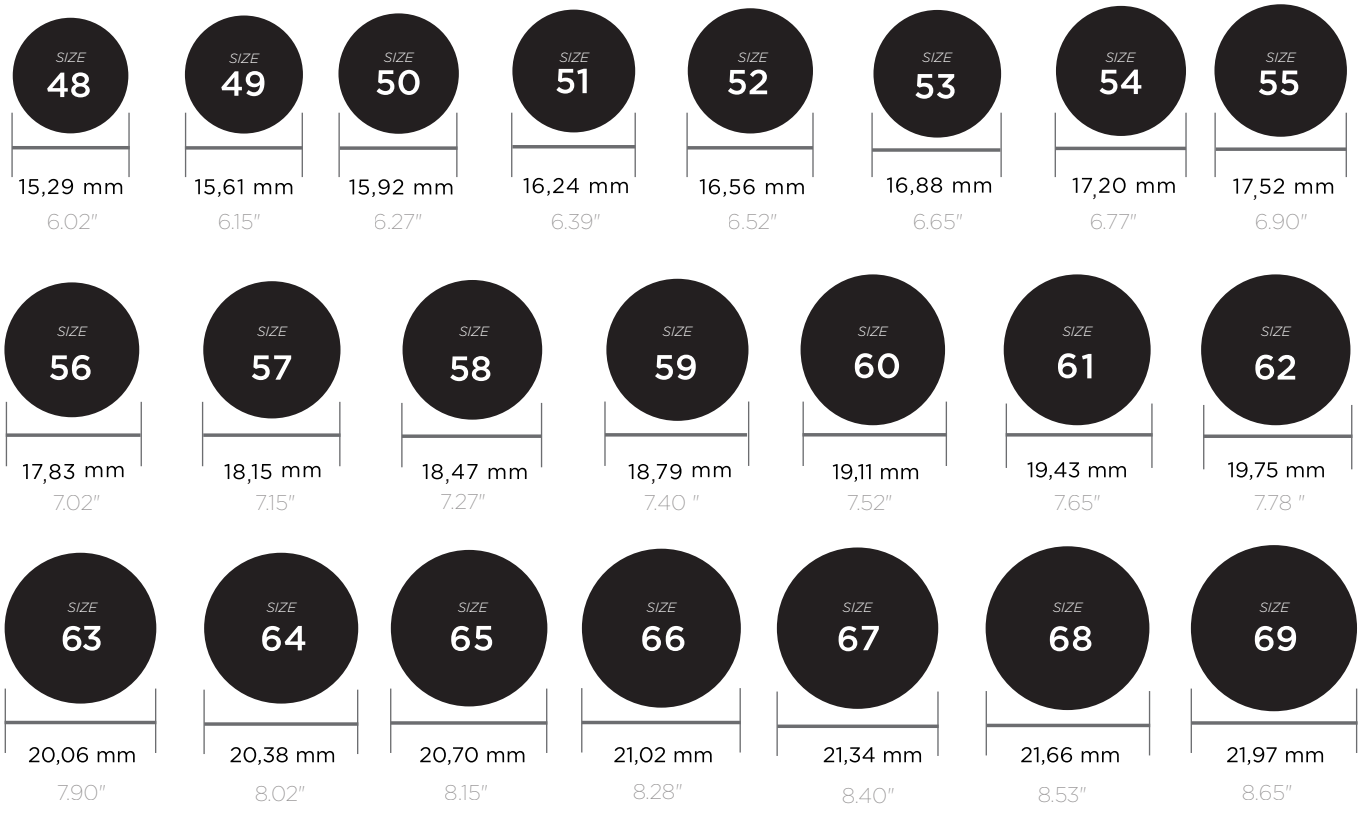
OR CHECK THAT THIS RULER MEASURES EXACTLY 2 INCHES.

You have two ways to determine your ring size.

Measure with a ring:

- Choose a ring (preferably not a bulky one, like a wedding band) that fits the size of the finger you want to wear your new Lalique ring on.
- Place it on the outline below and find the right size when the inner edge of the ring is perfectly aligned with the contour of one of the black circles.

If you are hesitating or if your perfect size falls between two measurements, we recommend that you choose the larger size. To comfortably wear an all-crystal ring (Cabochon or Charmante model), we recommend that you choose one size larger than the one you have determined.



Measure your finger:

- Take a piece of ribbon or cut a strip of paper 1 cm wide
- Roll it around the widest part of the finger where you will wear your new Lalique ring.
- Make a mark where the ribbon crosses.
- Using a ruler, measure the distance between the edge of the ribbon and your mark.
- Compare your measurement to the table below to find your ring size.

TIPS

Finger sizes vary depending on the time of day and temperature. It's best to take your measurement at the end of the day and not measure your fingers if they are too cold or wet, which could underestimate your size.

FINGER CIRCUMFERENCE		*DIAMETER OF THE RING*		*RING SIZE*
